PROFESSIONAL SUMMARY

Detail-oriented and analytical aspiring Data Analyst with a strong foundation in data analysis, data visualization, SQL, Python, Excel, Power BI, Pandas, NumPy, Matplotlib. Skilled in data cleaning, exploratory data analysis (EDA), statistical analysis, dashboard development, and transforming raw data into actionable business insights. Passionate about continuous learning, problem-solving, applying analytical skills to help organizations make informed business decisions while delivering accurate, high-quality results.

CORE SKILLS & TOOLS

- Programming & Query Languages: Python, SQL, Excel (Advanced)
- Data Analysis & Visualization: Power BI, Pandas, NumPy, Matplotlib, Data Cleaning, Statistical Analysis, Data Visualization
- AI & Productivity Tools: ChatGPT, Google Gemini, Prompt Engineering, AI-Assisted Data Analysis, Claude AI ● Version Control: Git-Bash, Git-Hub

FEATURED PROJECTS

Netflix Content Analysis Using SQL *SQL*

(MySQL), Git, GitHub

- Analyzed a Netflix dataset containing 8,800+ titles to answer business-focused questions using SQL.
- Applied SQL concepts including GROUP BY, HAVING, CTEs, Window Functions, Subqueries, Aggregate Functions, String Functions, and Date Functions.
- Performed data cleaning and explored trends in content production, directors, countries, ratings, genres, and release years.
- Generated analytical insights through 25+ SQL queries; documented the project with a structured GitHub repository and comprehensive README.
- GitHub: github.com/karansandul2004-stack/Netflix_SQL_Project

Austo Motor Company — Customer Purchase & Marketing Analysis

Python, Pandas, NumPy, Matplotlib, Seaborn, Jupyter

- Analyzed 1,581 customer records across 14 variables to identify purchasing patterns, customer segments, and factors influencing automobile preferences.
- Performed data cleaning and exploratory data analysis (EDA), handling missing values and inconsistent categorical entries to improve data quality.
- Analyzed relationships between demographics, financial attributes, marital status, education, loans, and vehicle preferences using statistical and visual techniques.
- Identified customer segments and purchasing trends, including differences in SUV, Sedan, and Hatchback preferences across demographic groups.
- Generated business recommendations for targeted marketing campaigns based on customer segmentation and purchase-value analysis.
- GitHub: github.com/karansandul2004-stack/Austo_AutoMobile_Motor_Project

WORK EXPERIENCE

Store Operations Management Intern | Pantaloons *September*

2024 – November 2024

- Assisted in receiving and organizing incoming stock from the warehouse, ensuring products were accurately sorted and prepared for the sales floor.
- Performed inventory counting and barcode scanning to support stock verification and maintain inventory accuracy.
- Prepared merchandise for sale by unpacking, tagging, and arranging products according to store guidelines.
- Organized product displays and ensured merchandise was presented according to visual merchandising standards.
- Assisted customers with trial room operations and worked collaboratively with the store team to support daily retail operations in a fast-paced environment.

EDUCATION

Data Analyst Program | Tops Technologies, Vadodara

December 2025 – Present

Bachelor of Arts (General) | Sikkim Manipal University, Gangtok, Sikkim *2022 –*

2025 Diploma in Hospitality | Aerostar Jet Training Academy, Vadodara *2024*

Higher Secondary | Jay Ambe International, GBSE

2022

Secondary | Swaminarayan Goodwill, CBSE

2020

CERTIFICATIONS

Data Analysis Using Python — IBM

Issued: Sep 21, 2026
